

## Miravis Prime fungicide for grapes

### Technical overview:

Miravis<sup>®</sup> Prime fungicide, available for use on grapes, is a combination of fludioxonil (FRAC group 12) and Adepidyn<sup>®</sup> fungicide (FRAC group 7). Adepidyn fungicide is a carboxamide molecule with an SDHI mode of action that provides more power and stamina for long-lasting disease control.

As a powerful disease management tool for growers, Miravis Prime sets a new standard in its class for spectrum and performance, and provides excellent control against key diseases like *Botrytis* and powdery mildew.

### Miravis Prime technical features:

- Powerful active ingredients deliver excellent disease control
- Complements integrated pest management disease programs
- Accumulates heavily into the wax layer and translocates through the leaves
- Remains stable on the leaf surface for even distribution and protection

### Key diseases controlled:

- Alternaria rot
- Angular leaf spot
- Anthracnose
- Black rot
- *Botrytis*
- Leaf blight
- Phomopsis cane and leaf spot
- Powdery mildew
- Rotbrenner
- Septoria leaf spot

### Miravis Prime efficacy on powdery mildew

Grow More<sup>™</sup> Experience site, 2017. Garrett Gilcrease. California

## Miravis Prime efficacy on *Botrytis*

USWC0F102-2013. Grape: Zinfandel. Three applications. Hurstak. California

## Miravis Prime keeps disease severity low

SS839-2018. Grape: Riesling. Six applications: April 15, May 11, June 4, June 30, August 23 and September 11. Disease assessment made October 15. Ukiah, California

## Miravis Prime helps produce higher yield than other brands when powdery mildew is present

SS866G-2018. Grape: Chardonnay. Disease present: powdery mildew. Merced, California
